

VIEW-IT® IR Laser Detectors provide a laser light detection solution for invisible infrared laser beams between 800nm and 1,700nm. When pulsed or continuous wave IR laser energy hits the VIEW-IT® IR target, the photons are shifted down in wavelength and converted to a visible green image.

This VIEW-IT® Infrared Laser Detector Disc is a convenient, handsfree, IR laser viewing device. The disc can be mounted on the included tabletop optical table stand with an adjustable post for centerline heights ranging from 6.97 to 9.97 inches.

A tabletop optical table stand with an adjustable height post is included.

Features and Applications

- Provides a crisp, high resolution image of the beam cross-section
- Useful for setup and alignment of IR laser beams
- No fading or saturation during continuous use, real-time viewing
- Image fades quickly when the laser is removed
- Assists in locating stray light to reduce light waste
- Uses energy from the laser beam; requires no charging or batteries
- Reusable

VIEW-IT® Infrared Laser Detector 3.75-Inch Diameter Target with Stand

Specifications and Operational Parameters	
Target Size	3.75 inches (95.25 mm) diameter
Input Wavelength Range	800-1,700 nm
Conversion Emission	530-550 nm (Green)
Minimum Sensitivity	1 mJ/cm ²
Laser Damage Threshold	30 W/cm ²
Material	aluminum, steel
Finish	anodized, infrared coating, oxide
Dimensions	4.25 x 2.00 x 9.08 inches (107.95 x 50.8 x 230.6 mm, L x W x H)

\$502.70

In Stock: Ships in 2 days
