

VIEW-IT® UV Laser Detectors provide a laser light detection solution for invisible ultraviolet laser beams between 190nm and 390nm. When pulsed or continuous wave UV laser energy hits the VIEW-IT® UV target, the photons are shifted up in wavelength and converted to a visible red image.

This VIEW-IT® Ultraviolet Laser Detector Disc is a convenient, handheld, UV laser beam viewing device mounted to a 6-inch wand for handheld extension into the laser beam path. The wand can be removed to accommodate other mounting options.

Features and Applications

- Provides a crisp, high resolution image of the beam cross-section
- Useful for setup and alignment of IR laser beams
- No fading or saturation during continuous use, real-time viewing
- Image fades quickly when the laser is removed
- Assists in locating stray light to reduce light waste
- Uses energy from the laser beam; requires no charging or batteries
- Reusable

VIEW-IT® Ultraviolet Laser Detector Disc 1.37 Inches Diameter with Wand

Specifications and Operational Parameters	
Target Size	1.37 inches (35 mm) diameter
Input Wavelength Range	190-390 nm
Conversion Emission	620-660 nm (Red)
Minimum Sensitivity	1 mJ/cm ²
Laser Damage Threshold	30 W/cm ²
Material	aluminum, steel
Finish	anodized, ultraviolet coating, oxide
Dimensions	7.74 x 1.88 x 0.25 inches (196.5 x 47.9 x 6.3 mm, L x W x H)

\$298.20

In Stock: Ships in 2 days
